TIKO — Design Document

1. Design overview

TIKO should feel like a calm, soft, rounded app that rewards you: pastel colors, pill shapes, gentle gradients, and a motif of linked dots that stands for streaks.

Reference	What we take from it
Muted pastel palette sheet (dusty blue, sage, peach, lilac, butter yellow, rose)	The base mood: low-saturation colors, cream backgrounds, one deep color per palette for text and contrast
Vivid palette sheet (teal, violet, lime, coral, sunflower)	Accent colors for celebrations, progress and module identity; the pill swatch plus round gradient chip pairing
Black-and-white connected-dots K logo	A shape language of smooth, merged circles, used as inspiration only; the TIKO mark is an original T drawn in that spirit

Design principles

1. Soft, not sterile. Rounded corners, no hard black lines, wide faint shadows.
2. One color per module. Habits, Money, Mind and Goals each get a hue so users know where they are without reading.
3. Big tap targets. Pills and circles at least 48 px: one thumb, no precision.
4. Celebrate quietly. Gradients and small motion for wins; never red failure states.
5. Calm density. At most 7 cards on Today before the list scrolls; generous space between.

The Pinterest pins and Figma file "Habit Tracking" from your references could not be opened from here. Attach screenshots and the layout choices in section 5 can be matched to them.

2. Color system

The palette is a cream base, a deep slate for text, one teal-blue brand color, and four soft module colors, each with a strong, a deep and a tint shade. Hex values are read from the two palette sheets and tuned toward 4.5:1 text contrast; check them once with a contrast tool before locking.

Role	Name	Hex	Use
Background	Cream	#F7F3EC	App background
Surface	Paper	#FFFFFF	Cards, sheets, bottom bar
Subtle fill	Mist	#EEF3F4	Inputs, empty rings, inactive chips
Divider	Line	#E4DED3	Hairlines, card borders
Primary text	Ink	#2E3A46	Headings, body
Secondary text	Slate	#5E6B78	Captions, labels
Brand and actions	Lagoon	#1F7A85	Primary buttons, links, active tab, the logo
Brand tint	Lagoon mist	#BFE0E4	Selected states, soft highlights

Module	Strong	Deep (text on tint)	Tint (card fill)
Habits	Sage #8DBA9C	#3F6B52	#DCEBE0
Money	Sun #E4B94E	#7A5C0E	#F7E9BD
Mind	Lilac #B79BC6	#6E5778	#E8DDEE
Goals and treats	Coral #E58A80	#A23B34	#F8D9D3

Status	Hex	Use
Success	#4E9A6B	Goal complete, saved
Notice	#D98A4B	Over budget, low streak; always paired with a kind message

Gradient chips (two-stop, 135 degrees, for ring fills, icon badges and treat cards): Habits #8DBA9C to #BFE0E4; Money #E4B94E to #F7E9BD; Mind #B79BC6 to #E8DDEE; Goals #E58A80 to #F7E9BD; Celebration #E58A80 to #E4B94E, then #8DBA9C.

Rules: backgrounds stay cream or paper; module colors appear only as tints, rings and badges, never full-screen fills; text on a tint uses that module's deep shade; never use color alone to show state, always pair it with an icon or a word; no harsh red anywhere.

3. Typography and logo

Type. One rounded, friendly sans-serif family in three weights: Nunito (free on Google Fonts), falling back to system-ui, Segoe UI, Roboto, sans-serif. Turn on tabular figures for amounts, timers and step counts.

Style	Size / line height	Weight	Use
Display	32 / 38 px	800	Celebration screens, big daily number
Title	24 / 30 px	800	Screen titles
Heading	18 / 24 px	600	Card titles, section heads
Body	16 / 24 px	400	Notes, journal text
Label	14 / 20 px	600	Buttons, chips, tabs
Caption	12 / 16 px	400	Hints, dates, units

Body text never goes below 16 px on phones; journal text is 18 px; line length stays under 70 characters.

Logo. The TIKO mark is a T built from five merged dots: three across the top and two down the stem, with the last dot a ring. The ring stands for the loop in a streak that keeps going, and the same chain is reused in the app as the streak indicator and the three-dot loading pulse. The wordmark is lowercase "tiko" in rounded strokes, with a dotted i and a ring o that echoes the mark. Files were sent with this message: tiko-lockup, tiko-app-icon, and SVG masters of the mark, reverse mark and wordmark.

Logo rules

- Colors: Lagoon on Cream, Cream on Lagoon, or white on black for one-color print.
- Minimum size 24 px; keep clear space equal to two dot widths on every side.

- Do not recolor the mark with module colors, add outlines or add shadows.
- The reference K logo is a style guide only; the TIKO mark must not copy its shape.
- Before launch, redraw the mark as a clean vector in Figma from the supplied SVG, and check the name TIKO for trademark and domain conflicts.

4. Shape, layout and components

Everything is a pill or a circle: tall pill swatches become progress bars and habit cards, and round gradient chips become icons and rings, exactly as in the palette sheets.

Token	Value	Use
Spacing unit	4 px; steps 4, 8, 12, 16, 24, 32, 48	All margins and padding
Screen padding	16 px phone, 24 px tablet, 32 px desktop	Outer gutter
Card radius	24 px	Cards, sheets, dialogs
Pill radius	999 px	Buttons, chips, tabs, tall habit pills
Icon badge	48 px circle, module gradient	Habit and module icons
Minimum tap target	48 x 48 px	Every tappable item
Elevation	0 8 24 px at 8% ink, one level only	Cards float softly on Cream
Max content width	480 px phone, 720 px centred on desktop	Keeps the phone-app feel

Layout: phone first with a bottom tab bar of 5 items (Today, Goals, Money, Mind, Me); on desktop (1024 px and up) it becomes a left rail with a 720 px content column. One column from 360 px, two columns of cards from 768 px. The quick-add button floats bottom right, above the tab bar, in the thumb zone. Icons are rounded line icons, 24 px, 2 px stroke, one set for the whole app (for example Lucide).

Components

Component	Look	Behaviour
Habit card	Tall pill or wide card on the module tint; 48 px gradient badge, name, today's value over target	Tap logs one unit or toggles done; long-press opens details; completed cards shrink and move down
Progress ring	Circle with gradient stroke on a Mist track; number in the centre	Fills with a 400 ms ease-out; small burst at 100%
Streak chain	Row of linked dots using the logo motif; filled for done days, ring for today	Grace day is a half-filled dot, never a break
Goal card	Card with a ring, goal text, days left and a treat chip	Tap opens the goal; treat chip glows on completion
Treat card	Icon on a coral gradient, treat name, cost chip	Claim button turns into a Trophy badge
Quick-add sheet	Bottom sheet with a big number pad, category pills, Save pill	Opens in under 150 ms; Save shows a 10-second undo toast
Mood picker	Five soft round faces on Lilac tints	One tap saves; a second tap line adds tags

Buttons: Primary (Lagoon fill, white text, pill, 48 px high); Secondary (Lagoon mist fill, Lagoon text); Ghost (no fill, for Later and Skip); Floating add (56 px Lagoon circle with a plus).

States: default; pressed (scale 0.97); disabled (50% opacity with a hint why); loading (three-dot pulse using the logo dots). Empty state: a soft illustration of three dots, one sentence, one button. Error state: a Notice-colored card with a kind message and a Try again button, never a red banner.

5. Key screens, motion, accessibility and dark mode

The Today screen is the product: the daily ring, a few habit cards, one money number and one mood row, with nothing hidden behind menus.

Screen	Layout	Notes
Today	Greeting, daily ring card, habit cards, safe-to-spend card, mood row, floating add	Cards sorted by usual logging time; finished cards shrink and drop to the bottom
Goals	Active goal cards with rings, then a Trophy shelf of claimed treats in a two-column grid	Goal builder opens as a 3-step sheet: what, how much and by when, treat
Money	Month budget bar, spending list grouped by day, savings goal cards with Sun gradient rings	Quick-add from the floating button; weekly insight card on Sundays
Mind	Mood calendar heatmap in Lilac tints, journal list, one prompt card	Breathing tool opens full screen on a Lagoon mist background
Me	Profile, habit library, reminders, backup and reset, about	Backup sits at the top because there is no account in guest mode

Celebration screen: full-height Cream screen, a large gradient ring that completes, the treat card rising from the bottom, a Claim pill and a Later ghost button. Confetti uses only the five module colors.

Motion

Moment	Motion	Duration
Tap a habit card	Press to 0.97 scale, gentle spring back; value counts up	150 ms
Ring fills	Stroke animates with ease-out	400 ms
Habit complete	Success tint, check draws in, card slides down	300 ms
Goal complete	Ring completes, confetti, treat card rises	1.2 s total
Treat claimed	Treat card turns into a Trophy badge and flies to the shelf	500 ms
Streak extends	Newest dot in the chain pops in with a small bounce	250 ms
Sheet open and close	Slide up with ease-out	200 ms

Moment	Motion	Duration
Loading	Three logo dots pulse in turn	Loops

Every log gives feedback within 100 ms, even before data is saved. Haptics: one light tap on log, a stronger pattern on goal complete. Sound is off by default. With reduced motion on, replace movement with fades and skip confetti.

Accessibility (WCAG 2.2 AA): text contrast at least 4.5:1 (3:1 for large text); every tappable item at least 48 px with a visible focus ring (2 px Lagoon outline, 2 px offset); every icon has a label or accessible name; each ring also shows its number; never rely on color alone; layouts hold at 200% zoom.

Dark theme follows the device setting by default, with a manual switch in Me. Treat these values as a starting point and test on real screens.

Role	Dark value
Background	#172026
Surface	#212C33
Mist	#2A373F
Line	#33434D
Ink	#EEF1F3
Slate	#A8B3BC
Lagoon (actions)	#5BC0CB
Module tints	Strong colors at 20% opacity over Surface; text uses the strong color

Responsive: 360 to 767 px one column with bottom tab bar; 768 to 1023 px two columns with bottom tab bar; 1024 px and up left rail, 720 px content column, optional side panel with the Trophy shelf.

6. Design tokens and Figma handoff

Paste this block into the app's global stylesheet; every component reads from these variables so the whole look can change in one place.

```
:root {
  /* neutrals */
  --cream: #F7F3EC; --paper: #FFFFFF; --mist: #EEF3F4;
  --line: #E4DED3; --ink: #2E3A46; --slate: #5E6B78;
  /* brand */
  --lagoon: #1F7A85; --lagoon-mist: #BFE0E4;
  /* modules: strong, deep, tint */
  --habits: #8DBA9C; --habits-deep: #3F6B52; --habits-tint: #DCEBE0;
  --money: #E4B94E; --money-deep: #7A5C0E; --money-tint: #F7E9BD;
  --mind: #B79BC6; --mind-deep: #6E5778; --mind-tint: #E8DDEE;
  --goals: #E58A80; --goals-deep: #A23B34; --goals-tint: #F8D9D3;
  /* status */
  --success: #4E9A6B; --notice: #D98A4B;
  /* gradients */
  --grad-habits: linear-gradient(135deg, #8DBA9C, #BFE0E4);
  --grad-money: linear-gradient(135deg, #E4B94E, #F7E9BD);
  --grad-mind: linear-gradient(135deg, #B79BC6, #E8DDEE);
  --grad-goals: linear-gradient(135deg, #E58A80, #F7E9BD);
  /* shape and spacing */
  --radius-card: 24px; --radius-pill: 999px;
  --space-1: 4px; --space-2: 8px; --space-3: 12px; --space-4: 16px;
  --space-6: 24px; --space-8: 32px; --space-12: 48px;
  --shadow-card: 0 8px 24px rgba(46, 58, 70, 0.08);
  --tap: 48px;
  /* type */
  --font: 'Nunito', system-ui, 'Segoe UI', Roboto, sans-serif;
}
```

Figma setup checklist

- [ ] Create color styles for every token above, with light and dark variants.
- [ ] Create text styles for the six type styles in section 3.
- [ ] Build the seven components in section 4 as Figma components with states.
- [ ] Import the TIKO SVG mark and wordmark; export at 24, 48 and 512 px.
- [ ] Design the five tab screens and the celebration screen for a 390 px wide phone.
- [ ] Compare your "Habit Tracking" Figma file against section 5 and note differences as comments.

Open design questions

- Should TIKO lead with the pastel mood (calm) or the vivid mood (energetic)? This document leads with pastel and uses vivid colors only for celebrations.

- Light theme only for v1, or light and dark from the start?
- Can you attach screenshots of the Figma screens so layout choices match them?
